

THE CRYSTAL RECORDS

Divination Destination

Over the last few months we have heard the same question, time and time again, from many customers & clients. “Do you have Oracle Cards?” Last month we would have shaken our heads “no” and offered our apologies. This month the answer is yes! Yes, we now have Oracle Card Decks in several styles, two of which include guidebooks. Sandra & Luz Elena

have selected their favorite decks to carry at the Gallery. At the moment we have limited quantities of each style available with plans to order more.

Classic Birthstones for March: Aquamarine & Bloodstone

So, what are Oracle Card decks and what makes them so popular? Simply put, Oracle Cards are a form of divination, the ancient practice of using spiritual means to search for knowledge of the SELF (the soul). Easier to read & understand than Tarot cards, they are very accessible to those of us who are beginning our spiritual journeys. They are tools for focusing our intuition and receiving spiritual guidance in the form of insight.

Crystal of The Month: Malachite

A copper based mineral, Malachite forms in beautiful & stunning concentric deposits. To the left you can see our new Malachite spheres, eggs, and towers from the Congo. We also carry Malachite in free forms and hearts. Malachite has an extraordinary healing energy. It can help restore deep & full breathing, assist all digestive functions, absorb pain, and clear psycho-emotional causes of illness. It is a stone of abundance & prosperity that can help us recognize and use our personal power. Like black tourmaline it also has a protective effect against EMF & is a good stone to have for protection while traveling.

Arriving Later this Month from Madagascar:

Dragon Septarians, Rose Quartz Hearts, Labradorite Pebbles, Celestite, Rhodonite, Gabro Indigo Pebbles, Peach Moonstone, Jasper, Petrified Wood, Yellow Hematite, & More!
